Assemblyman Robert Oaks
10 Leach Road
Lyons, NY 14489

Dear Assemblyman Oaks,

I'm including an [8x10 glossy](#) that summarizes my activity and of others regarding Family Rights. We've called your office and I've brought in parents to talk to your staff. *I'll also be sending the photo to local News media – it may provide an interesting story on the "power of chalk" and peaceful NonViolent Action to influence government.* Our web site has more pictures for them and also an activity history with you: http://www.AKidsRight.Org/family_rights

So many parents are hurt and left hopeless for change because they are intimidated by the huge system. *What I often hear is, "Why even try? Nobody cares."* Many just fall into depression/despair and some turn to violence and suicide. PLEASE give this your attention and give these people hope. It's my sincere hope you'll contact me with a willingness to bring these issues to the Legislature in Albany.

I had left you a DVD of the documentary movie "SUPPORT? System Down." You can see the pain of parents and hear the thoughts of experts (including judges) – on how broken Family Law is. *Any legal system that does not recognize fundamental rights is tragically flawed*

I received a mailing from your office about your campaign to call for a Constitutional Convention in New York. I think that is a great idea and I hope you will be able to endorse the attached [Declaration of Family Rights](#) as a foundation for any future Family Law legislation. There is also an on-line petition you can view and also read the comments left by parents:

<http://www.ThePetitionSite.com/3/the-declaration-of-family-rights>

I really hope you can take the small step of introducing a bill supporting [Parental Notification of Child Birth](#). Certainly, everyone I've talked to understands both parents have a right to know when their child is born.

Best regards!
